SHOCKWAVE

**1.5 HOUR
RUNTIME**

1200 LUMENS

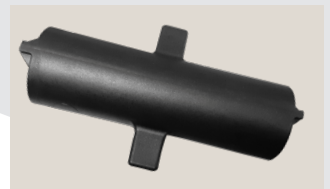

Ambidextrous switches provide support hand light and laser activation options from either thumb or fingers without adjusting grip.

Precision-engineered reflector creates a tight, bright beam with defined center spotlight and soft secondary halo.

Ergonomic palm swell and rubber overmold improve grip for light activation and weapon manipulation under stress.

Includes installation action tube wrench for removal of factory-installed castle nut and pump handle fore-end.
